Authorization for this examiner's amendment was given in a telephone interview with Paul Kiel on November 7, 2007.

IN THE CLAIMS

Claim 1 is amended by replacement of the first two lines with the following:

Allowable Subject Matter

4. The following is an examiner's statement of reasons for allowance:

The closest prior art in the field does not teach the combination of features found in the independent claim, particularly including: the configuration of the harmonizer module found in the local server and linked to an input interface, the configuration of the receiver/decoder device, and where the harmonizer module acts on first and second signals by remodulating them according to the same type of modulation, and wherein the receiver/decoder device comprises a demultiplexer module acting on the harmonized signal, and where the local server transmits a first and second software application to the receiver/decoder device that are used in processing the first and second signals.

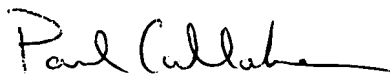

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
